DETAILED ACTION

Allowable Subject Matter

1. Claims 29-45 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious a video signal processing system, such as claimed in claims 29-45, the system has: a field scaler (item 320 of Fig. 3A, Figs. 6A and 6B) coupled to the first and the second buffers (item 350 of Fig. 3A), the field scaler operable to produce a scaled output video frame for a video display by independently selecting output between the first buffer and the second buffer, to produce from the first buffer output a first scaled (Fig. 6A) video frame having a second size different from the first size, and to output from the second buffer output a second scaled (Fig. 6B) video frame having the second size.

The closest prior art, Nomura et al (US 4,866,520) and Hewett et al (5,796,439) disclose conventional video signal processing system that has field scaler coupled to first and second buffers, either singularly or in combination, fail to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
